SUMMARY OF OUR INDUSTRY

The anticipated global real GDP growth for 2023 has been revised slightly upward to 3.2% from our November projections, indicating a modest 0.1% increase. As we approach the finalization of 2023 data with the release of Q4 numbers in February, the current trajectory of growth has notably outpaced earlier estimations.

Comparing the current outlook to projections made a year ago, there has been a substantial rise of one full percentage point in our global growth forecast. This surprising uplift primarily stems from the exceptional performance of the United States, which has exceeded expectations. Additionally, several emerging market economies, notably India, have displayed remarkable momentum, contributing to this unexpected positive trend.

Our projection for global real GDP growth in 2024 has seen a marginal increase of 0.1%, now standing at 2.6%. The Global Purchasing Managers Indices have indicated a concerning trend, showcasing a mild contraction in global industrial activity

over the past eighteen months. Furthermore, the more erratic global services activity stalled notably in October and November.

Our Manufacturing Facility is an approximately 4,050 square meters facility for acts as a large scale production facility. Our business is dependent upon our ability to manage our manufacturing facilities, which are subject to various operating risks, including those beyond our control, such as the breakdown, failure of equipment or industrial accidents, severe weather conditions and natural disasters. Any significant malfunction or breakdown of our machinery, our equipment, our reactors, our automation systems, our any other systems or any other part of our manufacturing processes or systems (together, our “**Manufacturing Assets**”) may entail significant repair and maintenance costs and cause delays in our operations. While we have not had such instances during the last three financial years (Fiscal 2021 to Fiscal 2023) where our Company was affected, we cannot assure you that we shall not experience any malfunction or breakdown of our Manufacturing Assets in the future. If we are unable to repair Manufacturing Assets in a timely manner or at all, our operations may need to be suspended until we procure the appropriate Manufacturing Assets to replace them. Although we have not experienced any significant disruptions at our manufacturing facilities in the past, we cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shutdown of our operations or the under-utilization of our manufacturing facilities, which in turn may have an adverse effect on our business, financial condition and results of operations.

- 5. *We derive a significant part of our revenue from major customers. If one or more of such customers choose not to source their requirements from us or to terminate their contracts with us, our business, financial condition and results of operations may be adversely affected.***

Our operations are dependent on the requirements of our customers, from our Top 5 Customers, we generate ₹3,240.80 Lakhs of revenue, which is 78.70% of the Total Revenue generated as on March 31, 2023. We are an innovation driven enterprise and to produce new products which attracts higher cost. Thus, the cost of the new product is comparatively higher than the usual product. This thus raises the price of the product and thus involves the risk of acceptance by the customer. As a result, number of potential consumer of our product/ services may reduce which will ultimately affect our potential revenue in future to that extent. Accordingly, any failure to retain these customers and/or negotiate and execute contracts on terms that are commercially viable, with these select customers, could adversely affect our business, financial condition and results of operations. In addition, any defaults or delays in payments by a major customer or the insolvency or financial distress by a major customer may have an adverse effect on business, financial condition and results of operations.

Cancellation by customers or delay or reduction in their orders or instances where anticipated orders fail to materialize can result in mismatch between our inventories of raw materials and of manufactured products, thereby increasing our costs relating to maintaining our inventory and reduction of our margins, which may adversely affect our profitability and liquidity. Further, we may not find any customers or purchasers for the surplus or excess capacity, in which case we would be forced to incur a loss. Further, our inability to find customers for surplus products may result in excessive inventories which may become obsolete and may be required to be written off in the future.

Additionally, our customers have high standards for product quality and quantity as well as delivery schedules. Any failure to meet our customers' expectations could result in the cancellation or non-renewal of contracts or purchase orders. There are also a number of factors, other than our performance that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, or replace their existing products with alternative products, any of which may have an adverse effect on our business, financial condition, results of operations and prospects.

6. Our top five suppliers contribute majority of our purchases. Any loss of business with one or more of them may adversely affect our business operations top five suppliers contribute and profitability.

Our top Five suppliers contributed approximately 94.36%, 91.68%, 91.58% and Nil of our total purchases for the period ended December 31, 2023 and for the Financial year ended March 31, 2023, March 31, 2022 and March 31, 2021 based on Restated Financial Statements. Our top five suppliers remain consistent supply to us over period of time due to the stable demand-supply mechanism. Consequently, the supply process from these suppliers remains unchanged as we consistently prioritize cost-effective sourcing in our normal course of business. Since our business is concentrated among relatively few significant suppliers, we could experience a reduction in our purchases and business operations if we lose one or more of these suppliers, including but not limited on account of any dispute or disqualification. While we believe we have maintained good and long-term relationships with our other suppliers too, there can be no assurance that we will continue to have such long-term relationship with them. We cannot assure that we shall do the same quantum of business, or any business at all, with these customers, and loss of business with one or more of them may adversely affect our purchases and business operations.

7. Our manufacturing process involves the use of hazardous and flammable industrial chemicals which entails significant risks and could also result in enhanced compliance obligations.

Our Company manufacturing and supply of Specialty Chemicals, consequently, our manufacturing facilities utilises various hazardous and inflammable industrial chemicals and other corrosive raw materials. While our Company believes that it has necessary controls and processes in place, any failure of such systems, mishandling of hazardous chemicals or any adverse incident related to the use of these chemicals or otherwise during the manufacturing process may cause industrial accidents, fire, loss of human life, damage to our and third-party property and, or, environmental damage. If any industrial accident, loss of human life or environmental damage were to occur we could be subject to significant penalties, other actionable claims and, in some instances, criminal prosecution. Any such event would in addition to adversely affecting our reputation also temporarily reduce our manufacturing capacity which could adversely affect our business, results of operations and reputation.

Further, any environmental damages could increase the regulatory scrutiny and result in enhanced compliance requirements including on use of materials and effluent treatment which would, amongst others, increase the cost of our operations.

Although we have identified the type of plant and machineries required to be bought however, we are yet to place orders for 100% of the Plant & Machinery, Civil work and installation cost thereon worth ₹2,091.54 Lakhs as detailed in the “*Objects of the Issue*” beginning on page 79 of this Prospectus. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost overruns, changes in management views of the desirability of current plans, change in supplier of plant & machineries, equipments among others, which may have an adverse effect on our business and results of operations. Further, we cannot assure that we would be able to procure these plant and machineries, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun, which would have a material adverse effect on our business, results of operations and financial condition.

- 10. The capacity of our current plant units is not fully utilized. Consecutively, if there is also any underutilization of our capacities in upcoming years, it could affect our ability to fully absorb fixed costs and thus may adversely impact our financial performance.**

The capacity of our current plants is not fully utilized. Our capacity utilization in the year 2021-22 has been 40% which has increased to 45% in the financial year 2022-23 and to 68% during the period from April, 2023 to December 31, 2023. Further, we propose to fully utilize our production capacities in coming years based on our estimates of market demand and profitability. - 11. Our Company has been recently incorporated in December 05, 2020 thus we have limited operating history as a Company which may make it difficult for investors to evaluate our historical performance or future prospects.**

Our Company was originally incorporated as a Private Limited Company under the Companies Act, 2013 with Registrar of Companies, Central Registration Centre through a certificate of incorporation dated December 05, 2020. We have very limited operating history from which one can evaluate our business, future prospects and viability. Our future revenues and profitability are difficult to estimate.

Our growth exposes us to a wide range of increased risks. It will also place significant demands on our management, financial and other resources and will require us to continuously develop and improve our operational, financial and internal controls. There can be no assurance that we will be able to successfully pursue our growth strategies, or that pursuing these strategies will provide us the anticipated benefits in terms of growth and profitability. Further, we may be unable to develop adequate systems, infrastructure and technologies, devote sufficient financial resources or develop and attract talent to manage our growth. Our inability to pursue our growth strategies successfully or at all, or an inability to manage our growth, may adversely affect our prospects. 12. There are certain discrepancies in our corporate compliances and we may be subjected to penalty in such event.

We had made an allotment of preference shares on October 01, 2021, subscription money in respect of which was received in our regular bank account instead of a separate bank account as per the requirements of the provisions of the Companies Act, 2013 and rules made thereunder. Although due allotment has been made in respect of aforementioned subscription amount as per the provisions of the Act and that no show cause notice have been issued in this respect. Our Company has initiated the process of Compounding as per Section 441 under the Companies Act, 2023 and the company may be subjected to penalty in such event.

13. Our Company has delayed the filing of annual audited financial statements and the payment towards its Employees Provident Fund (EPF) dues.

There has been an inadvertent delay in filing of Annual Return forms i.e., MGT-7 and AOC-4, and in filing EPF returns by our Company. Firstly, concerning the delay in filing our annual audited financial statements with the Ministry of Corporate Affairs (MCA), company compliance consultant, who plays a pivotal role in ensuring timely submission, was unfortunately incapacitated due to a severe bout of COVID-19. This unforeseen circumstance significantly impeded the preparation process of our financial statements, resulting in the delay in filing. Similarly, the delay in filing our Annual General Meeting (AGM) was also impacted by the aforementioned situation. The preparation of necessary documents and coordination for the AGM was hindered due to the absence of our compliance consultant during their recovery period, exacerbating the delay further.

Regarding the consistent delays in payments towards our Employees' Provident Fund (EPF) dues, we must acknowledge an oversight in understanding the applicability of certain regulations. Subsequently, there was a delay in rectifying this oversight, compounded by further delays in reactivating our Know Your Customer (KYC) documents, which are essential for EPF payments.

We understand the gravity of these delays and assure you that company is taking immediate steps to rectify the situation. We are actively working on expediting the preparation of our financial statements and ensuring compliance with all regulatory requirements which is overlooked by our Company Secretary and Compliance Officer. Additionally, measures are being implemented to streamline our EPF dues payment process and ensure adherence to deadlines going forward which is also overlooked by our Company Secretary and Compliance Office.

14. We are subject to strict quality requirements and any product defect issues or failure by us or our raw material suppliers to comply with quality standards may lead to the cancellation of existing and future orders, recalls and exposure to potential product liability claims.

We face an inherent business risk of exposure to product defects and subsequent liability claims if the use of any of our products results in personal injury or property damage. We may not be able to meet the quality standards imposed by our customers and applicable to our manufacturing processes, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

If any of our products are defective, we may be, inter alia, (i) responsible for damages relating to any defective products, (ii) required to replace or recall such products or (iii) incur significant costs to defend any such claims. The failure by us or any of our suppliers to achieve or maintain compliance with customer requirements or quality standards may disrupt our ability to supply products sufficient to meet demand until compliance is achieved or, until a new supplier has been identified and evaluated. The quality of raw materials will have an impact on the quality of the finished products and in turn affect our brand image, business and revenue. There is no assurance that our products will always meet the satisfaction of our customers' quality standards. Our failure to comply with applicable regulations could cause adverse consequences to be imposed on us, including injunctions, civil penalties, suspensions or seizures or recalls of products, operating restrictions and criminal prosecutions, all of which could harm our business. There can be no assurance that if we need to engage new suppliers to satisfy our business requirement, we will be able locate new suppliers in compliance with customer

requirements in a timely manner, or at all. Failure to do so could lead to the cancellation of existing and future orders and have a material adverse effect on our business and revenue. However, no such instances occurred in the past.

15. In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions. Further we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to change in name and conversion of company to public Company.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see “Government and Other Approvals” beginning on page no. 225 of this Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

16. There are certain discrepancies in our corporate compliances and we may be subjected to penalty in such event.

We had made an allotment of preference shares on October 01, 2021, subscription money in respect of which was received in our regular bank account instead of a separate bank account as per the requirements of the provisions of the Companies Act, 2013 and rules made thereunder. Although due allotment has been made in respect of aforementioned subscription amount as per the provisions of the Act and that no show cause notice have been issued in this respect, we are not sure that action shall be taken against us or at all in which event we may be subjected to penalty thus adversely affecting our profits.

For details regarding our capital structure, please refer section titled “Capital Structure” beginning on page no. 67 of this Prospectus.

17. One of our Directors Rajesh Madhukar Joshi was disqualified in past for being Director Under Section 164 of the Companies Act, 2013 due to non-filing of Annual returns and Financial statements of M/s. Sky Home Niwas Private Limited where he was a Director.

One of our Directors Rajesh Madhukar Joshi was disqualified Under Section 164 (2) of the Companies Act, 2013 during the period from November 01, 2017 till October 31, 2022, for being director of a company M/s. Sky Home Niwas Private Limited, which failed to file its Financial statements and Annual returns. The disqualification was later removed after completion of the disqualification period on October 31, 2022. Although our Company has appointed Rajesh Madhukar Joshi after completion of his disqualification and this did not cause any adverse effect on the business of our Company in the past, we are not sure that the director shall not incur any such disqualification in future and any such event in future may cause adverse effect on the day-to-day affairs of the Company, reputation and resultantly on the business of the Company and the concentration of our promoters cum Directors may shift from our Business thus adversely affecting our financial position.

18. We operate in a highly competitive industry. Any inability to compete effectively may lead to a lower market share or reduced operating margins.

We operate in a highly competitive industry with a number of other manufacturers that produce competing products, both in India and internationally. As a result, to remain competitive in the market we must continuously strive to reduce our production and distribution costs and improve our operating efficiencies and innovate our products offering. If we fail to do so, it may have an adverse effect on our market share and results of operations.

In relation to our products segment, we may incur significant expense in preparing to meet anticipated customer requirements which may not be recovered. For example, if a customer is preparing to launch a new product, we may need to incur substantial capital investments for transition of our manufacturing facilities and resources, which may adversely impact production rates or other operational efficiency measures at our facilities.

Many of our competitors may be larger than us and may benefit from greater economies of scale and operating efficiencies. There can be no assurance that we can continue to effectively compete with such manufacturers in the future, and failure to compete effectively may have an adverse effect on our business, financial condition and results of operations. Moreover, the competitive nature of the manufacturing industry may result in lower prices for our products and decreased profit margins, which may materially adversely affect our revenue and profitability.

19. Inventories and trade receivables form a major part of our current assets. Failure to manage our inventory and trade receivables could have an adverse effect on our sales, profitability, cash flow and liquidity.

Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets. The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand / potential orders and supply requirements and purchase new inventory accordingly. However, if we misjudge expected customer demand/ Potential orders, it could cause either a shortage of products or an accumulation of excess inventory. During the Stub period ended on December 31, 2023 and Financial Year ended March 31, 2023, March 31, 2022 and March 31, 2021 our inventories were ₹1,931.40 Lakhs, ₹875.12 Lakhs, ₹120.17 Lakhs and Nil.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if we fail to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. During the December 31, 2023 and Financial Year ended March 31, 2023, March 31, 2022 and March 31, 2021 our trade receivables were ₹1,618.73 Lakhs, ₹804.97 Lakhs, ₹291.54 lakhs and ₹Nil respectively. As on December 31, 2023 our outstanding due from the top debtor amounted to ₹1,480.34 lakhs representing 30.41 % of our total debtors against Our Sales of December 31, 2023. We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations. Such situation may require an additional and, consequently, higher finance cost which will adversely impact our profitability.

20. We are subject to increasingly stringent environmental, health and safety laws, regulations and standards. Non-compliance with and adverse changes in health, safety, labour, and environmental laws and other similar regulations to our manufacturing operations may adversely affect our business, results of operations and financial condition.

We are subject to a wide range of laws and government regulations, including in relation to safety, health, labour, and environmental protection. These safety, health, labour, and environmental protection laws and regulations impose controls on air and water release or discharge, noise levels, storage handling, treatment, processing, along with other aspects of our manufacturing operations. For instance, there is a limit on the amount of pollutant discharge that our manufacturing facility may release into the air and water. Environmental laws and regulations in India have become and continue to be more stringent, and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment, and emissions management and other expenditure to comply with environmental standards. Any failure on our part to comply with any existing or future regulations applicable to us may result in legal proceedings, including public interest litigation being commenced against us, third party claims or the levy of regulatory fines. Further, any violation of the environmental laws and regulations may result in fines, criminal sanctions, revocation of operating permits, or shutdown of our manufacturing facility. The occurrence of any of these events could have an adverse effect on our business, results of operations and financial condition.

As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. We cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations or financial condition. In addition, we could incur substantial costs, our products could be restricted from entering certain markets, and we could face other sanctions, if we were to violate or become liable under environmental laws or if our products become non-compliant with applicable regulations. Our potential

exposure includes fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. The amount and timing of costs under environmental laws are difficult to predict. We cannot assure you that we will not be involved in future litigation or other proceedings, or be held liable in any litigation or proceedings including in relation to safety, health and environmental matters, the costs of which may be significant.

21. Any adverse changes in regulations governing our business, products and the products of our customers, may adversely impact our business, prospects and results of operations.

Government regulations and policies of India as well as in the countries to which we export our products can affect the demand for, expenses related to and availability of our products. We have incurred and expect to continue incurring costs for compliance with such laws and regulations. Any changes in government regulations and policies, such as the withdrawal of or changes in tax benefits, incentives and subsidies or anti-dumping duties levied by India or other countries, could adversely affect our business and results of operations. Further, regulatory requirements with respect to our products and the products of our customers are subject to change. An adverse change in the regulations governing the development of our products and use of products by our customers may have an adverse impact on our operations. Our Company may be required to alter our manufacturing and/ or distribution process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers. We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for manufacturing and marketing new products or we may be required to withdraw existing products from the market. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/ or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

22. Our existing manufacturing facility are concentrated in a single region i.e., Lote, Maharashtra and the inability to operate and grow our business in this particular region may have an adverse effect on our business, financial condition, results of operations, cash flows and future business prospects.

Our manufacturing unit is located at Lote, Maharashtra which exposes us to risks of concentration. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Although in the past we have not experienced instances of operating risks, however our manufacturing facility is susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. It is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns at our facility due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

23. Improper handling of our products, or spoilage and damage to our products, could damage our reputation and may have an adverse effect on our business, results of operations and financial condition.

Our products are subject to risks during their transport or storage. Any shortcoming in the transport or storage of our products due to negligence, human error or otherwise, may damage our products and result in noncompliance with applicable quality standards. Any claim that our products do not match requisite quality standards could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis. We sell our products, directly to customers and if the products sold by those customers are found to be faulty on account of our products, our customers may return our goods, terminate their relationships with us and initiate legal proceedings against us. We cannot assure you that we will not be subject to such product liability claims in the future. Should any of our products be perceived or found to be faulty, we may be subject to regulatory action, product recalls and our reputation, business, results of operations and financial condition may be adversely affected. We may also be exposed to liability from consumers for defects in the quality of our products.

24. Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.

Our business and assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by our Company or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

25. We do not have long-term agreements with suppliers for our raw materials and an increase in the cost of, or a shortfall in the availability or quality of such raw materials could have an adverse effect on our business, financial condition and results of operations.

During the Stub period ended on December, 2023, and for the Financial Year ended March 31, 2023, March 31, 2022 and March 31, 2021, our Cost of Goods Sold (cost of materials consumed, Purchase of stock in trade and changes in inventories of finished goods) was ₹1,448.87 Lakhs, ₹1103.81Lakhs, ₹405.66 Lakhs and Nil respectively, which represented 70.23%, 73.20%, 77.06% and Nil of our revenue from operations. The raw materials we use in our manufacturing process are primarily sourced from third party suppliers in India. In addition, we usually do not enter into long-term supply contracts/ agreements with any of our raw material suppliers and typically source raw materials from the open market. The absence of long-term contracts/agreements at fixed prices exposes us to volatility in the prices of raw materials that we require and we may be unable to pass these costs onto our customers, which may reduce our profit margins. We face a risk that one or more of our existing suppliers may discontinue their supplies to us, and any inability on our part to procure raw materials from alternate suppliers in a timely manner, or on commercially acceptable terms, may adversely affect our business, financial condition and results of operations.

The quality of our products is primarily derived from the quality of our raw materials, and any deterioration in the quality of raw materials supplied to us will have an adverse effect on the quality of our products, market reputation and sales volumes. There can be no guarantee that we will be able to maintain our current line-up of suppliers or adequate supply of such raw materials at all times.

Further our Company has outstanding dues of trade payables during the stub period ended on December, 2023, and for the Financial Year ended March 31, 2023, March 31, 2022 and March 31, 2021 of ₹1,084.42 Lakhs, ₹90.72 Lakhs, ₹0.53 lakhs and ₹0.05 lakhs respectively. Any delay in payment to our creditors may impact our long-standing relations with our suppliers and may result in stoppage of timely or at all delivery of raw material. Any such disruption would impact the production and overall financial position of our Company.

26. Any shortages, delay or disruption in the supply of the raw materials we use in our manufacturing process due to factors beyond our control may have a material adverse effect on our business, financial condition, results of operations and cash flows.

We strive to maintain adequate inventory levels. We are expanding our suppliers base. However, if we face shortage in raw materials in the future, there can be no assurance that we may be able to acquire the raw materials from the market in a timely manner, or at all, and if we are not able to procure raw materials in sufficient quantities, we may not be able to manufacture our products according to our pre-determined timeframes or as contracted with our customers, at our previously estimated product costs, or at all. Therefore, any shortage, delay or disruption in supply of any of our raw materials could have an adverse effect on our business, results of operations, cash flows and reputation. For further details, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page no. 210 of this Prospectus.

28. We face competition from both domestic as well as multinational corporations and our inability to compete effectively may have a material adverse impact on our business, financial condition and results of operations.

We face competition in our business based on pricing, relationships with customers, product quality, customization, and innovation. We face pricing pressures from companies, that are able to produce such products at competitive costs and consequently, may supply their products at cheaper prices. We are unable to assure you that we shall be able to meet the pricing pressures imposed by such domestic or multinational competitors which would adversely affect our business, financial condition and results of operations. Additionally, some of our competitors may have greater financial, research and technological resources, larger sales and marketing teams and more established reputation. They may also be in a better position to identify market trends, adapt to changes in industry, innovate and develop new products, offer competitive prices due to economies of scale and also ensure product quality and compliance.

29. In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoter and Directors; they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Companies / Entities.

Our Company has entered into various transactions with related parties. While our Company believes that all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms, there can be no assurance that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Related party transactions that entered by the Company for Period ended December 31, 2023 and last three fiscals and are legitimate business transactions conducted on an arms' length basis, in compliance with the requirements stipulated in Companies Act, 2013, and relevant Accounting Standards and other statutory compliances. It is likely that our Company may enter into related party transactions in the future. Such related party transactions may potentially involve conflicts of interest. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost overruns, changes in management views of the desirability of current plans, change in supplier of plant & machineries, equipments among others, which may have an adverse effect on our business and results of operations. Further, we cannot assure that we would be able to procure these plant and machineries, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun, which would have a material adverse effect on our business, results of operations and financial condition.

For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page no. 79 of this Prospectus.

40. *We have significant ongoing funding requirements and may not be able to raise additional capital in the future. As a result, we may not be able to respond to business opportunities, challenges or unforeseen circumstances.*

Our major fund based financial assistance has been sanctioned by the bank, i.e., the Bank of India Limited, on the security of assets. The Company is dependent on these banks for its Working Capital requirement and capital expenditure and any default under such arrangement with such lender may create problem for operation of the Company, which may affect the financial stability of the Company. At the same time this may result into difficulty in arranging for funds for re-payment and may also affect the financial position of the Company. If we are unable in the future to generate sufficient cash flow from operations or borrow the necessary capital to fund our future capital expenditures, we will be forced to limit our growth. In addition, we may not be able to service our existing customers or to acquire new customers. The inability to raise additional capital on acceptable terms could have an effect on our business, results of operations and financial condition.

For further details of our loans, please refer chapter titled “*Restated Financial Statements*” beginning on page no. 170 of this Prospectus.

41. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favorable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt - equity ratio to increase or require us to create charges or liens on our assets in favor of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company’s Equity Shares and its ability to raise capital through an issue of its

securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

42. *Compliance with, and changes in, safety, health and environmental laws and various labour, workplace and related laws and regulations impose additional costs and may increase our compliance costs and a such adversely affect our results of operations and our financial condition.*

We are subject to a broad range of safety, health and environmental laws and various labour, workplace and related laws and regulations in the jurisdictions in which we operate, which impose controls on the disposal and storage of raw materials, noise emissions, air and water discharges, on the storage, handling, employee exposure to hazardous substances and other aspects of our operations. Compliance with, and changes in these laws may increase our compliance costs and as such adversely affect our results of operations and financial condition.

43. *Our management has discretion in how it may use the proceeds of the Issue. Any variation in the utilisation of our Net Proceeds would be subject to certain compliance requirements, including prior shareholders' approval.*

Our use of the proceeds of the Issue is at the discretion of the management of our Company. As described in the section titled "*Objects of the Issue*" beginning on page no. 79 of this Prospectus, we intend to use the Net Proceeds for various purposes, including but not limited to, (i) Funding of capital expenditure requirements of our Company towards purchasing Plant & Machinery, Civil work and installation cost thereon (ii) Working Capital Requirement; and (iii) General Corporate Purposes. However, we have not entered into any definitive agreements and do not have any definite and specific commitments towards the aforementioned purposes for which our Company intends to use the Net Proceeds. Further, the Net Proceeds are intended to be utilized by the Company only and none of the members of our Promoter Group or Group Companies will receive any portion of the Net Proceeds. The planned use of the Net Proceeds is based on current conditions and is subject to changes in external circumstances, costs, other financial conditions or business strategies. Any variation in the planned use of the Net Proceeds would require Shareholders' approval and may involve considerable time or cost overrun and in such an eventuality it may adversely affect our operations or business. In the event that there is such a change in the objects of the Issue, our Promoter shall provide an exit offer to dissenting shareholders as provided for in the Companies Act, 2013 and in terms of the conditions and manner prescribed under the SEBI ICDR Regulations.

44. *We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be obtained by our Company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.*

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Presently, we have applied for updating licenses and approvals in the name of "*Indian Emulsifiers Limited*" from "*Indian Emulsifiers Private Limited*". Also, we are yet to receive and renew several approvals and licenses. Non-obtaining or non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. Further we require to keep already obtained valid key approvals such as Tax Registrations, Shops and Establishment Act License, for running our operations in a smooth manner.

Some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business.

For further details, please see chapters titled "*Key Industry Regulations*" and "*Government and Other Approvals*" beginning on page no. 133 and 225 respectively of this Prospectus.

45. *Any IT system failures or lapses on part of any of our employees may lead to operational interruption, liabilities or reputational harm.*

The success of our businesses depends in part upon our ability to effectively deploy, implement and use information technology systems and advanced technology initiatives in a cost effective and timely basis. Our information technology

systems include multiple applications, coding, configuration and other systems that allocate resources and facilitate internal and external communications, enabling us to coordinate and make quick decisions across our business. Our computer networks may be vulnerable to un-authorised access, computer hacking, computer viruses, worms, malicious applications and other security problems caused by un-authorised access to, or improper use of, systems by our employees, subcontractors or third-party vendors. Any systems failure or security breach or lapse on our part or on the part of our employees and other ecosystem participants that results in the release of user data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability. Any such legal proceedings or actions may subject us to significant penalties and negative publicity, require us to change our business practices, increase our costs and severely disrupt our business.

Till the date of this Prospectus there have been no such instances or event that have occurred in the Company relating to the any IT system failures or lapses on part of any of our employees may lead to operational interruption, liabilities or reputational harm.

46. If our security measures are compromised, our products and services would be perceived as vulnerable, our brand and reputation would be damaged and customers could stop using our products and services, all of which would materially adversely affect us.

Our products and services store, retrieve and manage our customers’ information and data, external data, as well as our own data. Third parties may identify and exploit product and its service vulnerabilities, penetrate or bypass our security measures, and gain un-authorised access to our or our customers, networks and systems, any of which could lead to the compromise of personal information or the confidential information or our data or that of our customers.

High-profile security breaches at companies have increased in recent years, and security industry experts and government officials have warned about the risks of hackers and cyber-attacks targeting IT products and businesses. These risks will increase as we continue to grow, store and process increasingly large amounts of data, including personal information and our customers’ confidential information and data and other external data. Further, as privacy and data protection become more sensitive issues in India, we may also become exposed to potential liabilities. For instance, under the Information Technology Act, 2000 (“IT Act”), we are subject to civil liability for wrongful loss or gain arising from any negligence by us in implementing and maintaining reasonable security practices and procedures with respect to sensitive personal data or information on our computer systems, networks, databases and software. India has also implemented privacy laws, including the IT Security Rules, which impose limitations and restrictions on the collection, use and disclosure of personal information. We could suffer significant damage to our brand and reputation if a cyber-attack or other security incident were to allow un-authorised access to or modification of our customers’ data, other external data, or our own data or our IT systems or if the services we provide to our customers were disrupted, or if our products or services are perceived as having security vulnerabilities. Customers could lose confidence in the security and reliability of our products and services, and this could lead to fewer customers using our products and services and result in reduced revenue and earnings. The costs we may incur to address and fix these security incidents would increase our expenses. These types of security incidents could also lead to breach of contracts with customers, lawsuits, regulatory investigations and claims and increased legal liability, including contractual costs related to customer notification and fraud monitoring, all of which could materially adversely affect us.

Till the date of this Prospectus there have been no such instances or event that have occurred in the Company relating to any cyber-attack or other security breach that would compromise our Company’s data.

47. Our Object has not been appraised by any Bank or Financial Institution. Any significant deviation in the Object could adversely impact our operations and sustainability in absence of any independent monitoring agency.

The proposed objects for which the funds are being raised have not been appraised by any Bank or Financial Institution and the fund requirements are based primarily on management estimates. 49. There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

The issue proceeds are entirely at the discretion of the issuer/management. As per SEBI (ICDR) Regulations, 2018, appointment of monitoring agency is required only if Issue size exceeds ₹10,000 Lakh. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, as per the Section 177 of the companies Act, 2013 the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

50. Our business is dependent on our continuing relationships with our clients, with whom we have not entered into long term arrangements.

We do not have any long term arrangements with any of our clients. Our business is based upon mutual agreed terms with our clients without any written arrangement. Although we have satisfactory business relations with our clients but we cannot assure continued flow of business from them. The loss of or interruption of work by, a significant client or a number of significant client or the inability to procure work on a regular basis or at all may have an adverse effect on our revenues, cash flows and business and financial operations.

51. Our continued success is dependent upon our ability to hire, retain, and utilize qualified personnel.

The success of our business is dependent upon our ability to hire, retain, and utilize qualified personnel, including project managers, engineers, and corporate management professionals who have the required experience and expertise. From time to time, it may be difficult to attract and retain qualified individuals with the expertise and in the timeframe demanded by our clients, and we may not be able to satisfy the demand for our services because of our inability to successfully hire and retain qualified personnel.

If we cannot attract and retain qualified personnel or effectively implement appropriate succession plans, it could have a material adverse impact on our business, financial condition, and results of operations. Moreover, we may be unable to manage knowledge developed internally, which may be lost in the event of our inability to retain employees. The cost of providing our services, including the extent to which we utilize our workforce, affects our profitability. If an expected any award is delayed or not received, we could incur cost resulting from excess staff, reductions in staff, or redundancy of facilities that could have a material adverse impact on our business, financial conditions, and results of operations.

52. Our insurance coverage may be inadequate to satisfy future claims against us.

We maintain insurance coverage which is typical in our industry which we believe to be commercially appropriate for risks. However, such insurance may not be adequate to cover all our losses or liabilities that may arise from our operations. Our insurance policies contain exclusions and or all limitations on coverage, as a result of which, we may not be able to successfully assert our claims for any liability or loss under the said insurance policies.

Additionally, there may be various other risks and losses, specially arising out of our business agreements, for which we are not insured because such risks are either uninsurable or not insurable on commercially acceptable terms. Furthermore, there can be no assurance that in the future we will be able maintain insurance of the types or at levels which we deem necessary or adequate or at premiums which we deem to be commercially acceptable. The occurrence of an event for which we are not insured, where the loss is in excess of insured limits or where we are unable to successfully assert insurance claims from losses, could result in uninsured liabilities. Further, despite such uninsured losses we may remain obligated for any future financial indebtedness or other obligations related to our business. Any such uninsured losses or liabilities could result in an adverse effect on our business operations, financial conditions and results of operations.

53. Our success largely depends on our Board and Key Managerial Personnel and our ability to attract and retain them. Any loss of our director and key managerial personnel could adversely affect our business, operations and financial condition.

We depend significantly on the expertise, experience and continued efforts of our Chairman and Managing Director,

Whole Time Director, and our Key Managerial Personnel. If one or more members of our Board or key managerial personnel are unable or unwilling to continue in his / her present position, it could be difficult to find a replacement. Our business could thereby be adversely affected. Opportunities for key managerial personnel in our industry are intense and it is possible that we may not be able to retain our existing key managerial personnel or may fail to attract / retain new employees at equivalent positions in the future. As such, any loss of key managerial personnel could adversely affect our business, operations and financial condition.

Further we have not identified any alternate source of financing the “Objects of the Issue”. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our bank finance, debts, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans.

For further details, please refer to the chapter titled “*Objects of The Issue*” beginning on page no. 79 of this Prospectus.

Such circumstances can have an impact on our financial condition and results of operation.

56. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders’ investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

57. Failure to manage our stocks could have an adverse effect on our net sales, profitability, cash flow and liquidity.

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirement accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of supply or an accumulation of excess inventory. The excess stocks will need storage space and block our liquidity resulting in to loss.

58. We could be exposed to risks arising from misconduct, fraud and trading errors by our employees and Business Associates.

Frauds or other delinquencies by employees could include indulging in transactions that exceed authorized limits or present unacceptable risks to us; hiding unauthorized or unsuccessful trading activities from us; or the improper use of confidential information. Such misconduct could result in unexpected business risks, losses, invite regulatory sanctions and seriously harm our reputation and could even lead to litigation. The precautions we take to prevent and detect these activities may not be effective. Any delinquencies or trading errors on the part of our employees could materially affect our business operations, financial position and/or reputation.

Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Further, we cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows. The Government of India had announced the union budget for financial year 2023 and the Finance Act, 2023 received assent from the President of India on March 31, 2023. There is no certainty on the impact that the Finance Act, 2023 may have on our business and operations or in the industry we operate in.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required.

Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in FDI Policy. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

75. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in

Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

76. Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

78. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

79. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

80. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

81. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

82. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

Justification:

Particulars	Details
Trade Receivable Days	<p>Trade receivables are the amount owed to the Company by customers following sale of goods on credit. Trade receivable days are computed as a function of revenue from operations.</p> <p>Our company has estimated the holding level for Trade Receivables days as ranging from 80 days to 90 days considering the normal credit period in the chemical business. Estimated Trade receivable cycle will be 90 days to 80 days for FY 2024- 25 & FY 2025-26 respectively. Typically, the trade receivables cycle is approx. 2.5 months to 3 months however, due to the year-end, some debtors promptly make payments before March-2024 resulting in a lower receivables period as of year-end.</p> <p>We are expecting this to increase marginally to 90 days in Fiscal 2024 from Dec-2023 period and to remain stable in Fiscal 2025 and further reduced to 80 days, more credit period is offered to customers because to penetrate new customers and attract more orders, Company will be required to offer enhanced credit period so that it will encourage new customers to have a long-term business relation with us and also has a competitive edge.</p>
Other current assets	<p>Other current assets relate to Advance to Suppliers for the Raw Material requirement to fulfil the Sales. Accordingly, in line with increase in business operations, there will be need to purchase materials and by making advance payments to enhance cost efficiency of products.</p> <p>It also includes GST credit available to the company and TDS c/f in case excess TDS is deducted by our customers.</p>
Other current Liabilities	<p>Other current liabilities include salary payable as on period end, statutory dues and taxes payable including PT and GST. These payables including salaries & taxes are cleared promptly in the next regular cycle. This figure is expected to increase due to increase in size of the overall business.</p>
Other Financial Liabilities	<p>Other Financial liabilities include salary payable as on period end. These payables including salaries which are cleared promptly in the next regular cycle. This figure is expected to increase due to increase in size of the overall business.</p>
Short term Provisions	<p>Short term payable majorly includes income tax payable (net of Advance tax & TDS), CSR Payable and current portion of the gratuity provision made.</p>
Cash and Cash Equivalent	<p>For 2024, our company is poised to raise funds in the last quarter to due to which we won't have much opportunity to utilize these funds. With a strategic focus on both immediate and long-term objectives, a substantial portion of the funds will be allocated for a new and addressing working capital needs.</p> <p>For 2025, the raised capital, coupled with internal accruals, will be judiciously employed for inorganic growth initiatives, increased spending to capture more sales opportunities. The amounts for 2025 are as per normal business circumstances. The CCE for 2024 looks little higher since we have limited time to utilize these funds.</p>
Inventory Holding Days	<p>Throughout Fiscal Years 2022, 2023, our average inventory turnover days consistently rose, aligning with the growth in our revenue. During Stub period of Dec-23, holding days are low as compared to Fiscal Year 2024 Projections. during the stub period, the inventory days recorded a slight decrease to 29 days, attributed to a significant boost in sales throughout the period.</p> <p>In Fiscal year 2024, high activity period resulting in higher inventory levels, moreover as the prices of the inventory are on a rising mode the higher level of inventory carrying is not deterrent on the financial health of the company. Since the inventory in Fiscal 2024 and upcoming years the average inventory turnover days are estimated to increase.</p> <p>Higher Inventory level and holding days is necessary to meet the rapid demands of new orders effectively, in line with our strategic inventory management objectives.</p>

Particulars	Details
	Looking ahead to Fiscal Year 2025, our plan is to maintain the average inventory holding days at approximately 91 days. However, as the situation eases the company shall return to reducing the inventory holding period in the fiscal year 2026.
Trade Payables Holding Days	<p>In Fiscal Years 2022 and 2023 and Dec-23 stub period our average credit cycle period exhibited variations, with figures of 110 days, 38 days to 36 days respectively. The significant decrease in trade payables from Fiscal 2022 to Fiscal 2023 was primarily driven by the post effects of the Covid-19 pandemic. Subsequently, in Fiscal years 2023 and 2024 we managed to maintain the credit cycle period within the anticipated range.</p> <p>Looking forward to fiscal Year 2025 and 2026, we have set objectives to reduce the creditor cycle period to approximately below 30 days due to fulfillment of raw material orders on time by the vendors and thereby making payment effectively within creditor's terms.</p> <p>This strategic move is aimed at enhancing our business's overall value, which in turn, will allow us to negotiate more favourable terms and establish long-lasting relationships with our creditors.</p>

Source: Based on certificate by Statutory and Peer Reviewed Auditor, M/s Dave & Dave., Chartered Accountants vide its certificate dated April 15, 2024.

Reason for substantial increase of working capital requirement are mentioned below: -

1. Our Company's business is a working capital intensive and to address the current issue of limited working capital and achieve exponential growth, the company plans to infuse funds into working capital from the Issue Proceeds. Additionally, the company aims to establish partnerships with new clients by offering products at competitive prices and extending more favourable credit terms. These strategic initiatives are expected to drive future growth.
2. In our dynamic business environment, where customer demands fluctuate and inventory management plays a pivotal role, maintaining a robust working capital is imperative. Adequate working capital not only facilitates seamless inventory management but also enables us to meet customer demand promptly and efficiently. Unforeseen contingencies such as supply chain disruptions or production delays can adversely impact our operations. Having a surplus of working capital provides a cushion against such challenges, allowing us to navigate unforeseen obstacles without compromising on service levels or operational efficiency.
3. We offer our clients the flexibility to choose from various payment intervals, including monthly, fortnightly, or weekly, based on the nature of the product and the sourcing of its raw materials. This practice aligns with industry standards, ensuring convenience and adaptability for our valued customers. This flexibility can cater to the varying financial capabilities and preferences of our clients, making our products more accessible and appealing to a wider range of customers.
4. Due to the daily fluctuations in the prices on exchanges/platforms, products utilizing inputs such as fatty oils, fatty acids, and agricultural crops exhibit varying price volatilities, with shorter durations for the former and slightly longer durations, particularly post-cropping season, for the latter due to reduced volatility. Additionally, raw materials linked to petroleum and its derivatives entail a relatively longer validity contingent upon price stability. Longer duration orders pose a high risk, particularly in the face of global crises such as the Covid pandemic, conflicts like the Ukraine War, Middle East tensions, and logistical disruptions like the Suez Canal blockage. Consequently, there is a need for increased working capital to accommodate shorter-duration orders.
5. To survive in competitive market, company is planning to enter into newer region and expand our business. This strategic decision is not just about reaching new markets, it's about solidifying our position in the industry and fostering sustainable growth. By venturing into untapped territories, we aim to unlock fresh opportunities, broaden our customer base, and diversify our revenue streams.
6. Our methodology for estimating orders relies predominantly on historical data, ongoing feedback from customers regarding their present and anticipated consumption trends, and a comprehensive analysis of overall market demand, encompassing our understanding of expected trends and patterns. The pricing structure of our products is subject to fluctuations based on the inputs involved, thus necessitating month-to-month or shorter-term order arrangements. Presently, we do not have any long-term supply contracts with a fixed pricing, as this is feasible only for very large orders of single products.

7. The existing working capital requirements:

- a. The inventories increased by ₹1,056.28 Lakhs (120.61%) from March 31, 2023 to December 31, 2023 and Increased by ₹754.95 Lakhs (621.95%) from March 31, 2022 to March 31, 2023. Such an increase was due to increase in business operations of the Company and higher production and procurement of goods in order to take advantage of favourable market conditions. Since speciality chemical industry is a growing industry, to meet the growing demands the Company will increase its inventories as depicted in estimations for FY 2024-25 and FY 2025-26.
- b. The Trade receivables increased by ₹813.76 Lakhs (101.22%) from March 31, 2023 to December 31, 2023 and increased by ₹513.43 Lakhs (176.21 %) from March 31, 2022 to March 31, 2023. This increase is attributed to higher sales on credit terms and increased business volume. To reach a higher customer base and increase the volume of sales, the Company will have to undertake credit sales resulting in an upward trend in trade receivables as depicted in estimations for FY 2024-25 and FY 2025-26.
- c. The increase in Borrowings by ₹239.95 Lakhs (413.46%) from March 31, 2021 to March 31, 2022 and by ₹568.87 Lakhs (191.02%) from March 31, 2022 to March 31, 2023 was a result from strategic borrowing to fund growth initiatives and operational requirements and a similar increase can be seen in the estimations for FY 2024-25 and FY 2025-26.
- d. To meet the increasing demands, the purchase of raw material often times is done on credit basis resulting in increase in Trade Payables of the Company by ₹90.19 Lakhs from March 31, 2022 to March 31, 2023 and by ₹993.70 Lakhs from March 31, 2023 to December 31, 2023. The Company plans to reduce the reliance of trade credit to finance its operations and as a result of the same, the estimations for FY 2024-25 and FY 2025-26 depict a diminishing increase in the Trade Payables.
- e. The average debtor collection cycle has increased from 49 days in FY 2023 to 68 days in FY 2024 and the average creditor payment cycle has remained the same. As a result, the working capital requirement of the company has increased in FY 2023-24.

Justification of Working Capital for FY 2023 vis a vis 2022

1. The chemical prices in FY 2023 had reduced drastically on an average basis by 30-35% as compared to FY 2022. As a result, the working capital requirement for FY 2022-23 is substantially less than FY 2021-22.
2. The Financial Year 2021-22 was the first year of operations of the company and therefore the company was unable to obtain high credit cycles from its debtors and creditors. Accordingly, the working capital cycle for the first year via FY 2022 was abnormally high.
3. The Gross Revenue of the company has increased by 2.3 times in FY 2023 and working capital has increased only 1.79 times in FY 2023. The reason for the in-equivalent increase in working capital is for the reason that the promoter had given unsecured loan to the company to the extent of 3.14 Crores. The said funds had been mobilized into day to day operations of the company in time and since the rotation of money with Debtor and Creditor was faster the company was able to grow faster and the working capital requirement of the company had grown only in a controlled manner.
4. The 'Working Capital Margin Ratio' for FY 2022 cannot be compared to FY 2023, because the PAT margins in FY 2022 was extremely low due to smaller factory and lower revenue from operations and high fixed costs.

Justification of Working Capital for FY 2024 vis a vis 2023

1. The average debtor collection cycle has increased from 49 days in FY 2023 to 68 days in FY 2024 and the average creditor payment cycle has remained the same. As a result, the working capital requirement of the company has increased in FY 2023-24.
2. The Working Capital disclosed for December 2023 of Rs. 24.33 Crores includes 'Advance given for Plant & Machinery' of 5.13 Crores. Accordingly, the said amount should be excluded while comparing the working capital for FY 2023 and FY 2024.
3. The company has started procuring raw materials from Large distributors in FY 2024 as against smaller traders in FY 2023. Therefore, the purchase prices of RM have gone down but the lead time for procuring raw materials has increased. The average stock holding period of the company has increased from an average 20-25 days to 50-60 days in FY 2024. This has resulted in an increase in working capital for FY 2024. This is the primary reason for raising

funds in the IPO.

SECTION VI – ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and industry sources. Neither we nor any other person connected with the Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but that their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly, investment decisions should not be based on such information. You should read the entire Prospectus, including the information contained in the sections titled “Risk Factors” and “Restated Financial Statements” and related notes beginning on page no. 24 and 170 respectively of this Prospectus before deciding to invest in our Equity Shares.

ECONOMIC GROWTH

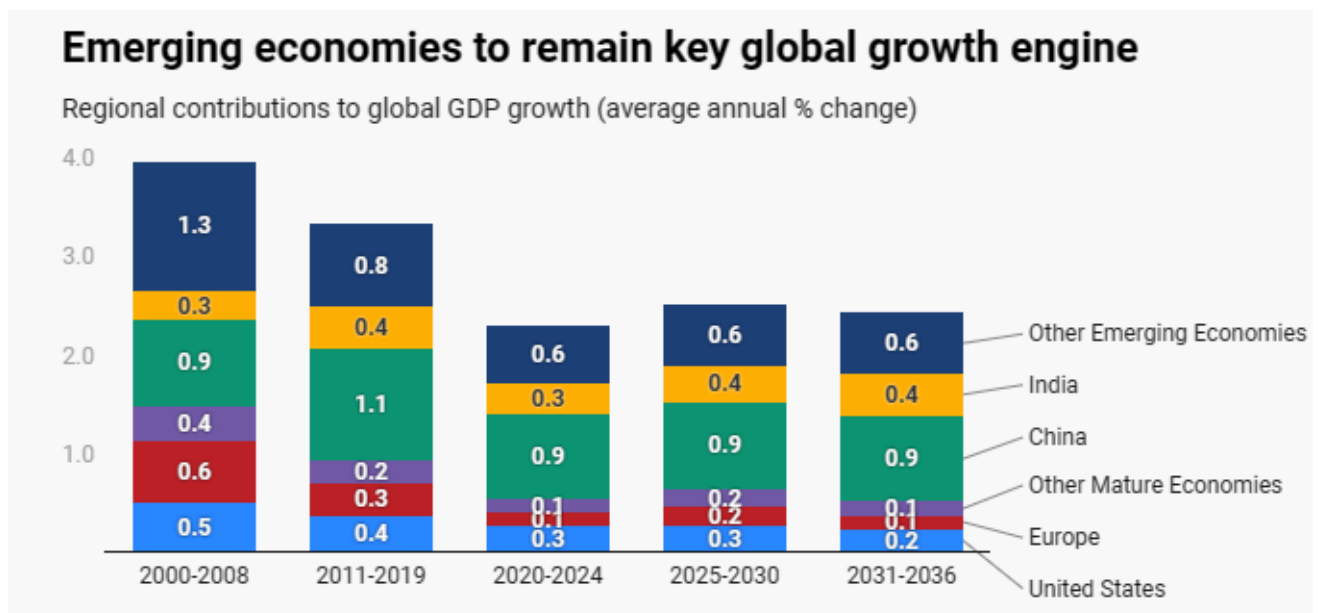

The anticipated global real GDP growth for 2023 has been revised slightly upward to 3.2% from our November projections, indicating a modest 0.1% increase. As we approach the finalization of 2023 data with the release of Q4 numbers in February, the current trajectory of growth has notably outpaced earlier estimations.

Comparing the current outlook to projections made a year ago, there has been a substantial rise of one full percentage point in our global growth forecast. This surprising uplift primarily stems from the exceptional performance of the United States, which has exceeded expectations. Additionally, several emerging market economies, notably India, have displayed remarkable momentum, contributing to this unexpected positive trend.

Our projection for global real GDP growth in 2024 has seen a marginal increase of 0.1%, now standing at 2.6%. The Global Purchasing Managers Indices have indicated a concerning trend, showcasing a mild contraction in global industrial activity over the past eighteen months. Furthermore, the more erratic global services activity stalled notably in October and November.

This prevailing weakness is anticipated to persist into the early months of 2024. It is largely attributed to the impact of rigorous monetary policy tightening implemented globally to address inflationary pressures. These measures are expected to exert a constraining influence on economic activity.

The upside growth surprises in 2023 stemmed mainly from emerging and developing economies. Growth accelerated to what we expect will be a rate of 4.5% in 2023, up from 3.9% in 2022. Emerging and developing economies will lose some of that momentum next year, but we still project 3.8% real GDP growth for both 2024 and 2025, well above our longer-term model forecast. Yet, it is mature/advanced economies other than the US that experienced the most difficult 2023. Real GDP growth among that group of economies slowed from a very robust 3.1% in 2022 to a projected 0.9% in 2023, and our 1% forecast for 2024 suggests only limited improvement in 2024.

Indian Economy

India to witness GDP growth of 6.0 per cent to 6.8 per cent in 2023-24, depending on the trajectory of economic and political developments globally. Economic survey 2022-23 projects a baseline GDP growth of 6.5 per cent in real terms in FY24.

India is one of the fastest growing economies of the world and is poised to continue on this path, with aspirations to reach high middle-income status by 2047, the centenary of Indian independence. It is also committed to ensuring that its continued growth path is equipped to deal with the challenges of climate change, and in line with its goal of achieving net-zero emissions by 2070. The growth of the past two decades has also led to India making remarkable progress in reducing extreme poverty. Between 2011 and 2019, the country is estimated to have halved the share of the population living in extreme poverty - below \$2.15 per person per day (2017 PPP) (World Bank Poverty and Inequality Portal and Macro Poverty Outlook, Spring 2023). In recent years, however, the pace of poverty reduction has slowed especially during the COVID-19 pandemic, but has since moderated in 2021-22.

Certain challenges persist. Inequality in consumption continues, with a Gini index of around 35 over the past two decades. Child malnutrition has remained high, with 35.5 percent of children under the age of 5 years being stunted, with the figure rising to 67 percent for children in the 6-59 months age group. Headline employment indicators have improved since 2020 but concerns remain about the quality of jobs created and the real growth in wages, as well as around the low participation of women in the laborforce.

India's aspiration to achieve high income status by 2047 will need to be realized through a climate-resilient growth process that delivers broad-based gains to the bottom half of the population. Growth-oriented reforms will need to be accompanied by an expansion in good jobs that keeps pace with the number of labour market entrants. At the same time, gaps in economic participation will need to be addressed, including by bringing more women into the workforce.

Specialty chemicals are renowned for their exceptional outputs, excellent performance and high functional qualities. These compounds can be formulated to impact the final product's composition, functionality and processing or they can exist as distinct chemical entities. Chemicals, in particular, can be further divided based on the end-user industries.

Furthermore, unlike the commoditized chemical sector, these substances result from substantial research and development, which is a key distinction. A specialty chemical may be limited to one or two primary applications instead of a commodity with hundreds of different applications. Depending on how well they perform, these compounds are used. The market's ongoing R&D has aided in creating goods with top-notch and cutting-edge features.

The demand for agrochemicals is rising, leading to the growth of specialty chemicals. Another primary factor driving the global market for specialty chemicals is the demand created by emerging countries in various end-use sectors.

The growing demand for agrochemicals Due to the growing population and rise in food consumption, agrochemicals are becoming increasingly necessary for enhanced crop protection and production, causing the specialty chemicals market to expand over the forecasted years. Farmers' growing awareness regarding the usage of agrochemicals in farming is causing the market to grow.

A loss in agricultural land due to higher urbanization and industrialization leads to a growing need for agrochemicals to raise crop yield per acre of land, driving the specialty chemicals market growth throughout the forecast period.

Diversified applications of specialty chemicals in emerging economies to give items or substances the intended effect, specialty chemicals are added. Therefore, specialty chemicals find employment across various end-use sectors, including consumer products, packaging, food processing, automotive and pharmaceuticals, due to their numerous properties and compatibility with many other chemicals and substances. For instance, specialty chemicals are widely utilized as fuel additives to improve the quality of gasoline in the automotive industry.

Similarly, many lotions and creams use specialized compounds, such as methyl oleate, as active medicinal ingredients. Due to these countries' rapid industrialization and urbanization rates, specialty chemicals are predicted to have a strong market in emerging economies like India, Brazil and China. Additionally, urbanization has significantly increased people's living standards and purchasing power in these nations.

After COVID-19, one of the main obstacles for manufacturers of specialized chemicals is acquiring raw materials. Before the start of the 2019 pandemic, the majority of producers in the specialty chemicals market relied on China for the supply of raw materials. Manufacturers are reducing their reliance on China as a source of raw materials because of concerns about future uncertainty from the country since it is where the virus originated.

To procure raw materials, manufacturers are expected to use the 1+1 hypothesis (different sourcing techniques). However, as viral transmission spread to many countries throughout the world, it has become crucial for producers to pinpoint alternative supply possibilities. There is a possibility of scarcity in the production of raw materials after COVID-19.

The COVID-19 epidemic in 2020 had a detrimental effect on the market. A pandemic scenario caused numerous countries to go into lockdown, which caused supply chains to get disrupted, work stoppages and a labor shortage. Construction, mining, automotive, cosmetics, food & beverage and other businesses were badly impacted. OICA estimates that in the first three quarters of 2020, worldwide automotive output was around 17.9 million units, 31.1 million units and 52.1 units, respectively, down about 23.1%, 32.4 percent and 22.9 percent from the same period the previous year.

Segment Analysis

By end-user, the specialty chemicals market is segmented into cosmetic chemicals, dyes, inks, & pigments, construction

chemicals, food additives, industrial manufacturing & institutional cleaners, foundry chemicals, electronic chemicals, lubricants & oil additives, oilfield chemicals, rubber processing chemical, textile chemicals, water treatment chemicals, specialty polymers, plastic additives, paints & coatings, mining chemicals, flavors & fragrances and pharmaceutical chemicals.

The majority of the market share is anticipated to belong to pharmaceutical chemicals. The wide range of pharmaceutical industry explains its uses, including the creation of medications for Hughes syndrome, skin conditions and cardiovascular ailments. Pharmaceutical ingredients are essentially the active components found in pharmaceuticals.

Geographical Analysis

Due to important emerging economies like China, India and Japan in this region, which recorded the greatest market share in the specialty chemicals industry, Asia-Pacific is predicted to have the largest market share overall. For international investors, the region offers significant investment options. Due to China's position as one of the top manufacturing hubs for most industries, including pharmaceuticals & nutraceuticals, personal care & cosmetics, automotive and electrical & electronics, Asia-Pacific has emerged as one of the world's fastest-growing markets for specialty chemicals.

Furthermore, the market for specialty chemicals is anticipated to offer attractive prospects due to the economies of Singapore, Malaysia, Thailand and India's increasing industrialization & diversification. Another factor driving the expansion of the specialized chemicals sector in India is the unprecedented use of chemicals for water treatment. Trade liberalization, rising demand for electronics, improvements in process technology and rising standards of living in most developing nations all contribute to the specialty chemical industry's expansion.

OVERVIEW OF THE CHEMICALS INDUSTRY IN INDIA

India's chemical industry is extremely diversified and can be broadly classified into bulk chemicals, specialty chemicals, agrochemicals, petrochemicals, polymers, and fertilisers. India is the 6th largest producer of chemicals in the world and 3rd in Asia, contributing 7% to India's GDP. India's chemical sector, which is currently estimated to be worth US\$ 220 billion in 2022 and is anticipated to grow to US\$ 300 billion by 2025 and US\$ 1 trillion by 2040.

Globally, India is the fourth-largest producer of agrochemicals after the United States, Japan and China. India accounts for 16-18% of the world production of dyestuffs and dye intermediates. As per Chemexcil (Chemicals Export Promotion Council), India's agrochemicals export was estimated to be at US\$ 1.04 billion from April 2023-June 2023 (Provisional). Indian colorants industry has emerged as a key player with a global market share of ~15%. The country's chemicals industry is de-licensed, except for few hazardous chemicals. India has traditionally been a world leader in generics and biosimilars and a major Indian vaccine manufacturer, contributing more than 50% of the global vaccine supply. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at global level (excluding pharmaceuticals). From April 2023 to June 2023 (provisional), India's dye exports (Dyes and Dye Intermediates) totaled US\$ 561.56 million.

The domestic chemicals sector's small and medium enterprises are expected to showcase 18-23% revenue growth in FY22, owing to an improvement in domestic demand and higher realisation due to high prices of chemicals. Domestic demand is expected to rise from US\$ 170 billion-US\$ 180 billion in 2021 to US\$ 850 billion-US\$ 1,000 billion by 2040.

The Indian chemicals industry stood at US\$ 178 billion in 2019 and is expected to reach US\$ 304 billion by 2025 registering a CAGR of 9.3%. The demand for chemicals is expected to expand by 9% per annum by 2025. The chemical industry is expected to contribute US\$ 383 billion to India's GDP by 2030.

India has traditionally been a world leader in generics and biosimilars and major Indian vaccine manufacturers, contributing more than 50% of the global vaccine supply. Chemicals and petrochemicals demand in India is expected to nearly triple and reach US\$ 1 trillion by 2040.

An investment of Rs. 8 lakh crore (US\$ 107.38 billion) is estimated in the Indian chemicals and petrochemicals sector by 2025. The specialty chemicals constitute 22% of the total chemicals and petrochemicals market in India. The demand for specialty chemicals is expected to rise at a 12% CAGR in 2019-22.

The Department of Chemicals & Petrochemicals intend to bring PLI in chemical & petrochemical sector and will redraft the Petroleum, Chemicals and Petrochemicals Investment Region (PCPIR) guidelines.

Indian manufacturers have recorded a CAGR of 11% in revenue between FY15 and FY21, increasing India's share in the global specialty chemicals market to 4% from 3%, according to the Crisil report. A revival in domestic demand and robust exports will spur a 50% YoY increase in the CAPEX of specialty chemicals manufacturers in FY22 to Rs. 6,000-6,200 crore (US\$ 815-842 million). Revenue growth is likely to be 19-20% YoY in FY22, up from 9-10% in FY21, driven by recovery in domestic demand and higher realisations owing to rising crude oil prices and better exports.

Moreover, according to the CRISIL report, the specialty chemicals market in India would grow faster than China, increasing its market share to 6% by 2026 from 3-4% in fiscal 2021. A shift in the global supply chain brought on by the China+1 strategy and a resurgence in domestic end-user demand will fuel significant revenue growth of 18-20% in 2022 and 14-15% in 2023.

India is in a unique position to benefit from the shift away from China owing to competitive cost advantage and incentivized government policies and reforms (such as allowing 100% FDI in chemicals). For instance a global specialty player in 2021, formed a JV with an Indian glycols player and plans to invest in ethylene oxide derivatives. China's production capacity in agrochemicals is limited, proving beneficial for Indian players as they expand capacities (an Indian agrochemical company and an intermediates player are expanding production capacities).

India is already a net exporter of specialty chemicals owing to low-cost manufacturing capabilities, strong standards of environmental compliance and an increased number of products meeting the globally acceptable registration requirements, such as REACH. However, the country still has import substitution potential due to the net import nature of sectors such as dyes and pigments, along with certain polymers (acrylic)

Markets Size

The Indian chemicals industry stood at US\$ 178 billion in 2019 and is expected to reach US\$ 304 billion by 2025 registering a CAGR of 9.3%. The demand for chemicals is expected to expand by 9% per annum by 2025. The chemical industry is expected to contribute US\$ 383 billion to India's GDP by 2030.

India has traditionally been a world leader in generics and biosimilars and major Indian vaccine manufacturers, contributing more than 50% of the global vaccine supply. Chemicals and petrochemicals demand in India is expected to nearly triple and reach US\$ 1 trillion by 2040.

An investment of Rs. 8 lakh crore (US\$ 107.38 billion) is estimated in the Indian chemicals and petrochemicals sector by 2025. The specialty chemicals constitute 22% of the total chemicals and petrochemicals market in India. The demand for specialty chemicals is expected to rise at a 12% CAGR in 2019-22.

The Department of Chemicals & Petrochemicals intend to bring PLI in chemical & petrochemical sector and will redraft the Petroleum, Chemicals and Petrochemicals Investment Region (PCPIR) guidelines.

Indian manufacturers have recorded a CAGR of 11% in revenue between FY15 and FY21, increasing India's share in the global specialty chemicals market to 4% from 3%, according to the Crisil report. A revival in domestic demand and robust exports will spur a 50% YoY increase in the CAPEX of specialty chemicals manufacturers in FY22 to Rs. 6,000-6,200 crore (US\$ 815-842 million). Revenue growth is likely to be 19-20% YoY in FY22, up from 9-10% in FY21, driven by recovery in domestic demand and higher realisations owing to rising crude oil prices and better exports.

Moreover, according to the CRISIL report, the specialty chemicals market in India would grow faster than China, increasing its market share to 6% by 2026 from 3-4% in fiscal 2021. A shift in the global supply chain brought on by the China+1 strategy and a resurgence in domestic end-user demand will fuel significant revenue growth of 18-20% in 2022 and 14-15% in 2023.

OUR BUSINESS SEGMENT/ MAJOR PRODUCTS INCLUDE

Our main products are broadly categories in:

Sr. no.	Name of the Product
1.	Esters
2.	Amphoterics
3.	Phosphate esters
4.	Imidazolines
5.	Wax emulsions
6.	SMO & PIBSA Emulsifiers

1. ESTERS.

Esters are made by reacting a select fatty acid with an alcohol. The fatty acid employed is usually oleic acid or stearic acid. The alcohol can be a monohydric alcohol like ethyl hexanol, or a dihydric alcohol like ethylene glycol or neopentyl glycol, or a polyhydric alcohol (polyol) like trimethyl propane, pentaerythritol, glycerol, sorbitol etc.

Esters are used in a wide variety of Industries extensively. While the ethylene glycol esters and glycerol esters are used as pearling agents and emulsifiers, the higher alcohol esters are used as emollients for creams and lotions.

Application: -

- Fragrances and Flavors:** Esters contribute to the pleasant scents and flavors in perfumes, cosmetics, and food products. Many natural and artificial flavors are esters.
- Solvents:** Some esters serve as solvents in paints, coatings, and cleaning products due to their ability to dissolve various substances.
- Plastics and Polymers:** Esters are building blocks for polymers like polyesters, which are used in making textiles, packaging materials, and bottles.

- **Pharmaceuticals:** They play a role in pharmaceuticals as ingredients in drug formulations and in the production of various pharmaceutical compounds.
- **Lubricants:** Certain esters are used as lubricants in automotive and industrial applications due to their properties like high lubricity and thermal stability.

2. AMPHOTERICIS.

These are preferred in industrial cleaning formulations due to its hydrotropic and dirt lifting properties, especially when applied by pressure washers. Amphoteric elevates the cloud point of detergent systems and formulations containing non-ionic surfactants, alkali and builders.

They impart free rinsing properties on detergents, leaving a smear free surface. They have very low toxicity and can be used in cleaning in the food industry.

The Dipropionates and Monopropionates are made by reacting fatty alkyl amines and acrylic acid. By changing the type of alkyl amine, and also by changing the mole ratio of the reactants, different grades of Amphoteric are produced.

The Betaines are produced by the reaction of tertiary amines with sodium mono chloro acetate. These are used extensively in shampoos and hand wash formulations by cosmetics manufacturers.

Application: -

- **Personal Care Products:** Due to their mildness and compatibility with the skin and hair, amphoteric are commonly used in cosmetics and personal care formulations.
- **Cleaning and Detergents:** They are utilized in household and industrial cleaning products for their ability to provide foaming, cleansing, and mildness properties.
- **Industrial and Institutional Applications:** Amphoteric find use in various industrial processes, including inks, coatings, and as additives in the textile and leather industries.

3. PHOSPHATE ESTERS.

Mono and diesters of phosphoric acids from alcohols, ethoxylated alcohols and ethoxylated alkyl phenol substrates. They are made by phosphorylation reaction of fatty alcohol substrates by either the polyphosphoric acids route or the phosphorus pentoxide route.

They are highly versatile surfactants offering wide range of applications and are characterized by good stability in alkaline systems and hydrotropic.

They are used in hard surface cleaners, laundry detergents, textile and leather, maintenance chemicals, traffic film removers, paper de-inking, acid cleaners.

They are extensively used in lubricant formulations due to its multiple properties of emulsification, lubricity, load carrying and anti-corrosive properties. They are also used in oil-field chemicals.

Application: -

- **Flame Retardants:** Phosphate esters are widely used as flame retardants in plastics, textiles, electronics, and construction materials. They help reduce the spread of fires and enhance fire safety in various products.
- **Lubricants:** Some phosphate esters serve as lubricants in industrial machinery due to their excellent lubricating properties and resistance to degradation at high temperatures.
- **Detergents and Cleaners:** Their surfactant properties make certain phosphate esters valuable in cleaning products, contributing to their foaming and cleaning abilities.

4. IMIDAZOLINES.

They strongly adsorb on negatively charged surfaces like metal, fibres, plastic, glass and minerals, converting them into hydrophobic surfaces.

They are produced by reacting fatty acids with polyamines, and then carrying out cyclisation at high temperatures.

Imidazolines contain a tertiary amine grouping and thus can be quaternised with usual quaternising agents to form textile softeners.

Application: -

- **Oil and Gas Industry:** Imidazolines are extensively used in the oil and gas sector as corrosion inhibitors in drilling fluids and pipeline systems to protect metal surfaces from degradation caused by corrosive substances.
- **Cleaning and Personal Care:** Their surfactant properties make imidazolines useful in various cleaning products, shampoos, and cosmetics, contributing to their foaming and cleansing abilities.
- **Agricultural and Biocidal Applications:** Imidazolines with biocidal properties are used in agriculture as fungicides and in disinfectants and antiseptics for their ability to inhibit microbial growth.

5. WAX EMULSIONS.

They are manufactured under high pressure or the wax to water method. Wax Emulsions are used in paper coating to impart gloss and water resistance. They are used in textile industry as softeners and lubricants.

They are used in paints and printing inks as anti-scuff and anti-mar additives. They are used as temporary protective coatings, façade protection and in wood polishes.

Application: -

- **Construction and Coatings:** Wax emulsions are applied in construction materials like paints, coatings, and sealants to enhance durability and water resistance.
- **Paper and Packaging:** They are used in paper coatings to impart gloss and improve moisture resistance in packaging materials.
- **Personal Care and Cosmetics:** In personal care products, wax emulsions are utilized in creams, lotions, and cosmetics for their emollient properties.
- **Agriculture:** Wax emulsions find use in agrochemicals for their role in creating protective coatings on seeds or as components in crop protection formulations.

6. SMO & PIBSA EMULSIFIERS.

Polymeric Surfactants are new generation emulsifiers. We will be making different grades of SMO (Sorbitan Mono Oleate) and PIBSA (poly iso butylene succinic anhydride) which are used in the mining industry in the form of its adducts, as water-in-oil emulsifiers for making Emulsion Explosives. They also ensure appropriate sleeping time, gassing rate, viscosity and water resistance.

Another application of PIBSA is in the lubricants industry. PIBSA is an oil-soluble emulsifier now increasingly used in high performance Metal Working Fluids. MWF are required for all metallic operations to make metal components and to make industrial machinery. The use of coolant extends cutting tool life, improves part finish and tolerance, and improves productivity.

Another major application of PIBSA is in the automotive industry. It is an important component in Engine Oils, in the form of its imide derivative, called PIBSI (poly iso butylene succinic imide). These succinic dispersants consist of a polyisobutylene hydrocarbon chain connected to a polyethylene polyamine substituent group by a succinic anhydride linking group. PIBSI dispersants are ashless, chlorine-free, oil-soluble detergents cum dispersants and are used to formulate finished lube oils including all types of automotive and diesel engine crankcase oils, air and water-cooled 2-cycle engine oils, natural gas engine oils, marine trunk piston engine oils and medium speed railroad diesel engine oils. In additive packages, they are used at 5-50% dosage levels. These additive packages are then blended into finished oils where the typical concentration of PIBSI ranges from 0.5-10%.

The Company will derive its success from its technical capabilities in the production of a wide range of Speciality Chemicals.

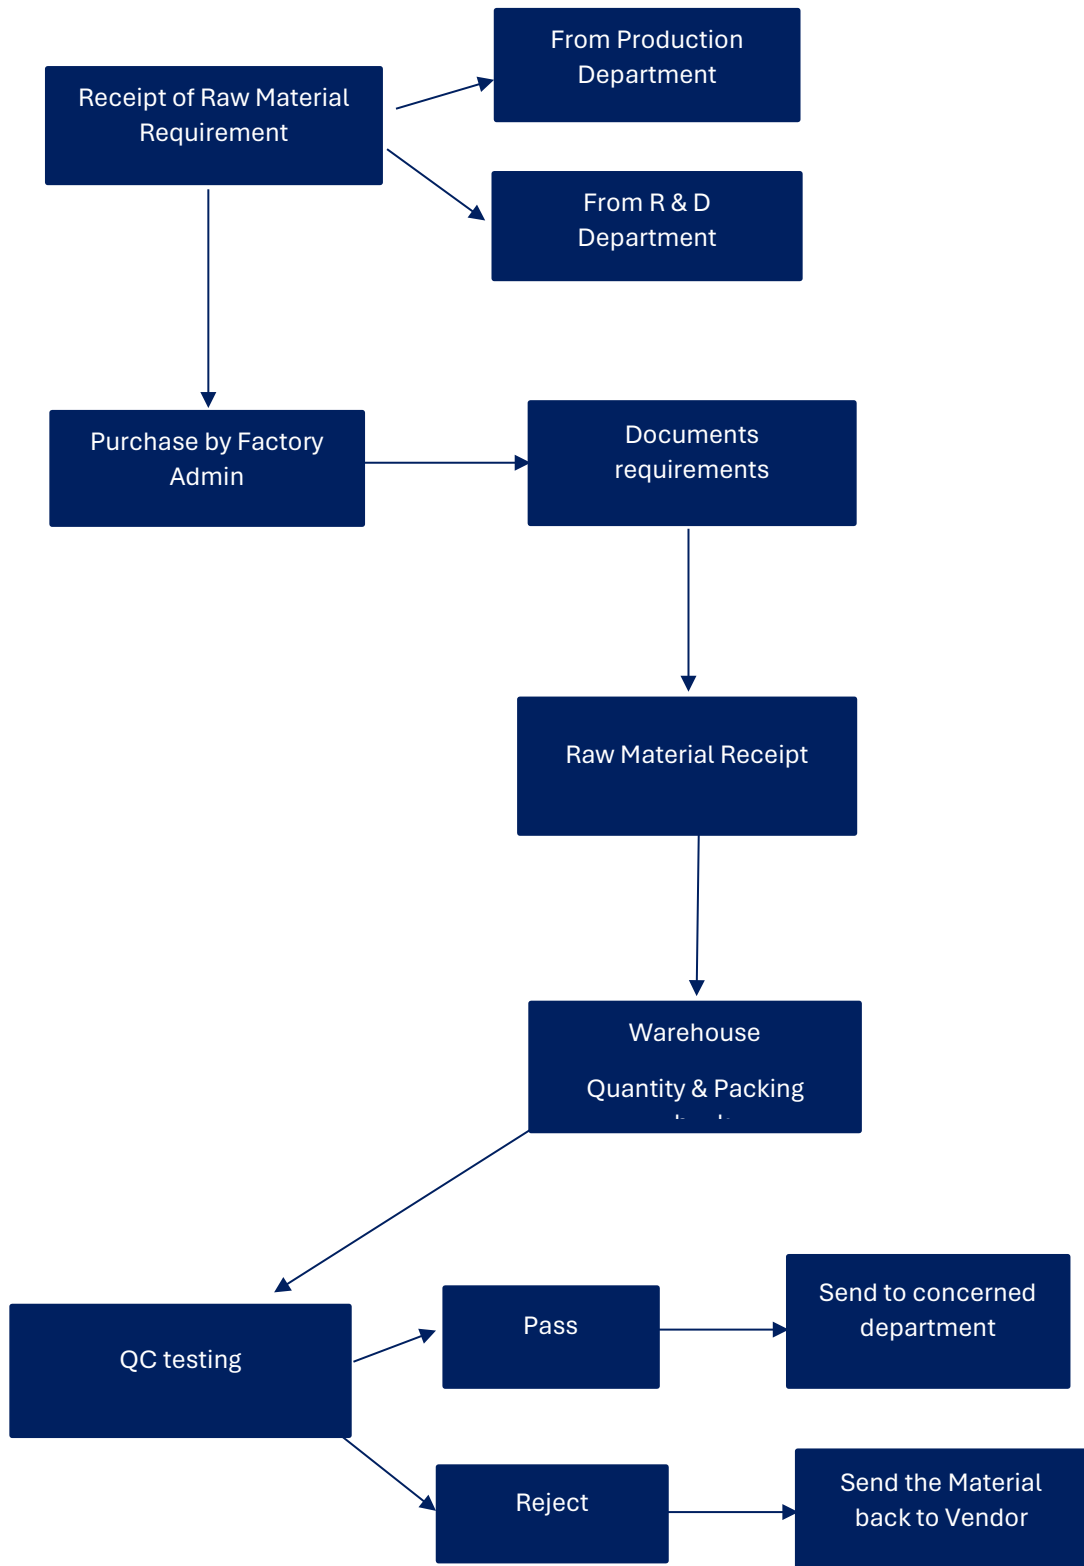

Speciality Chemicals are sold on the basis of their performance rather than their chemical composition. The commodity Surfactants are also typically modified into performance blends, with added value that results from special processing.

The Speciality Chemicals that we will make provides a diverse product line and customer base, where higher percentage margins can generally be obtained. This combination also provides significant opportunities for new businesses, and some insulation from the cyclicity that characterizes most commodities.

Application: -

- Industrial Processes: Both SMO and PIBSA find applications in various industrial processes. SMO contributes to emulsification and stabilization of products, while PIBSA is used for corrosion protection and lubrication.

The following steps define the chain of events in case of a new project/ customer order:

Enquiry from Customer:

As a Specialty Chemical Company, the process typically begins with receiving inquiries from customers regarding specific chemical products tailored to their requirements. These inquiries could range from custom formulations to existing product offerings. If we have Stock in our store which is readily available for suitable customer, then we directly dispatch to them from our warehouse.

Raw Material Availability Check:

If specific stock is not readily available to dispatch to customer, then the next step involves checking the availability of raw materials required to manufacture the requested Chemical Product. This involves assessing inventory levels, lead times for procurement, and ensuring that the necessary materials are in stock or can be sourced in a timely manner.

Purchase Requisition:

Once the raw material availability is confirmed, a purchase requisition is generated to procure the required materials. This involves communicating with suppliers, negotiating prices, and placing orders to ensure a steady supply chain.

Raw Material Receipt in Stores:

Upon delivery, the raw materials are received in the stores department, where they undergo inspection for quality and quantity by our in-house Research and Development team. This step is crucial to ensure that only high-quality materials are used in the manufacturing process, adhering to strict quality standards.

Production:

With the necessary raw materials in stock, the production process begins. This involves carefully following formulation recipes, mixing chemicals, and adhering to precise manufacturing protocols to produce the desired chemical product. Quality control measures are integrated throughout the production process to maintain product consistency and integrity.

Testing (QA and QC Department) and Packing:

After production, the finished chemical products undergo rigorous testing in the quality assurance (QA) and quality control (QC) departments. This involves conducting various tests to assess product quality, purity, stability, and safety parameters. Once the products pass quality testing, they are packed according to customer specifications, ensuring proper labeling and packaging to meet regulatory requirements.

Stores Department and Dispatch to Customer:

The packed products are then transferred to the stores department for final inventory management. Upon receiving customer orders, the products are picked, packed, and dispatched for delivery. This involves coordinating with logistics partners to ensure timely and efficient delivery to customers while maintaining product integrity throughout the supply chain.

Overall, the business model of a specialty chemical company revolves around delivering high-quality, customized chemical solutions to meet customer needs while maintaining stringent quality control measures and ensuring efficient supply chain management from raw material procurement to product dispatch.

BUSINESS STRATEGY

Expand our existing product portfolio.

We have, since our inception, consistently sought to diversify our portfolio of products which could cater to customers across segments, sectors, and geographies. In accordance with this, while we seek to continue to strengthen our existing product portfolio, we intend to further diversify into products with prospects for increased growth and profitability. We plan to continue to increase offerings in our current business segments as well as diversify into new products by tapping into segments which in the view of our management have attractive growth prospects. For instance, we intend to increase our focus on products manufactured using continuous flow chemistry as these will be more sustainable and are good value propositions.

In addition, given the increasing number of environment conservation initiatives being undertaken by governments across the world, we believe that the demand for automotive emission control mechanisms are going to grow. Further, we believe that since the requirements of the various sectors that our existing customers are currently servicing are continuously evolving, as a consequence of the same, there will be a continuous demand to evolve our existing products and expand our product portfolio to meet these requirements. We believe that our emphasis on quality of manufacture and timely delivery of our offerings have been a key factor in our ability to attract new customers and to retain our existing customers. We intend to draw on our experience, market position and ability to timely deliver quality products to successfully foray into other sectors as well as to other geographies.

Expand our existing manufacturing capacities to capitalise on industry opportunities.

We have, over the years, consistently grown our manufacturing and production capabilities. We seek to capitalize on the growth opportunities in the specialty chemicals industry based on our well positioned operations and being led by an experienced management team. Our Company's aggregate manufacturing capacity has doubled from 2,400 MT in the financial year 2021-22 to 4,800 MT per annum* in the financial year 2022-23 and 3,600 MT per annum for the period ended December 31, 2023. Consistent with past practice, we will look to add capacity in a phased manner to ensure that we utilize our capacity at optimal levels. We believe our expansion plans and strategy will allow us to meet the anticipated increase in the demand for our products in the future, enable us to supply growing markets more efficiently and drive profitability.

**As certified by M.L. Kendre & Associates, Chartered Engineer, by way of their certificate dated February 07, 2024.*

Increasing Operational efficiency.

We will continue to invest in increasing our operational efficiency throughout the organization. Higher operational effectiveness results in greater production volumes and higher sales, and therefore allows us to spread fixed costs over a higher number of units sold, thereby increasing profit margins. We further intend to continue and invest in our in-house technical capabilities to develop customized systems and processes and ensure effective management control over our critical resources for optimal utilization.

Continue to focus on contract manufacturing / exclusive manufacturing by developing innovative processes and value engineering.

We seek to continue to explore opportunities to enhance our existing customer relationships by undertaking customer relationship and manufacturing services for new molecules. We believe our focus on value engineering by extending our process and chemistry expertise to enter into new value chains and replace the lower value products with higher value products in the same chemistry will enable us to service more of our customers' needs and increase our revenues from existing customers. By leveraging the long-standing relationships and repeat orders from our customers, we intend to capitalize on the significant cross-selling opportunities that higher value products offer. Further, we intend to focus on early-stage process innovation and development that we believe will enable us to capitalize on the complete lifecycle of these products and give us the opportunity to be the initial suppliers for such customized speciality chemicals and strengthen our relationships with multinational corporations.

Continue to focus on innovation and grow our business across customer segments.

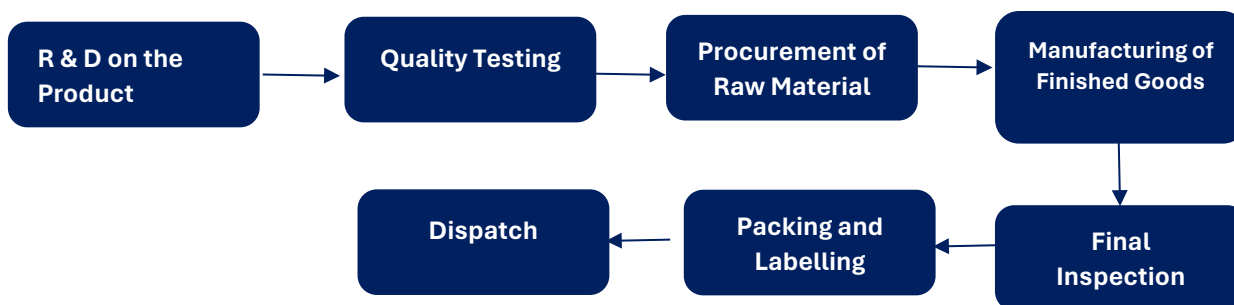

As a manufacturer of specialty chemicals, we understand that performance and functionality of our products are the primary drivers for their success with our customers. Accordingly, we seek to continue to focus on our ability to customize our products according to the specific requirements of our customers through innovation including creation of new molecules and focusing on sustainable solutions. We continuously seek to improve on our products to make them more effective for our customers and their applications and processes. We aim to innovate, manufacture and supply specialty chemicals which will make the processes followed by our customers more efficient, environmentally more sustainable as well as more cost efficient. We also seek to improve our agility and flexibility in offering customized products to our customers at short notice which we believe will be a differentiator among the companies engaged in manufacturing specialty chemicals in

near future. Towards that we have customer service and support to all our customers and each of our customers has been tagged individually to an executive of our Company. We want to continue to focus on such dedicated consultative processes between our customers and our Company as that helps us to understand the processes followed by our customers and their specific application requirements better and we are able to provide them specific solutions at the earliest. We want to continue to promote and strengthen our formulation and application expertise which is led by our technical R&D team. We also seek to grow our business across diverse customer segments by focusing on innovation and customization of our solutions. We believe that our ability to customize our products for the various applications of our customers at a short notice can help us diversify our operations across different customer segments.

PROCESS FOR FINISH GOODS

Akin to our business model, our Research & Development Department wherein the product is developed, standardized and commercialized capacity which later goes through various Quality testing with our Quality Assurance and Quality Control Department. Initially the product to be developed based on the reactions we can do in our facility is theoretically formulated on paper, desired raw materials are identified and procured through procurement department and then development trials are conducted in the laboratory in glass set-up and then Autoclave set-up based on progress of the development. Development may happen over 4-5 trials or may take 50 trials depending on the complexity of the product. Once the product is developed as per desired specifications, the Research and Development will finalize a Standard Operating Procedure and internal testing specifications for the raw materials, in-process and finished product for this development product.

The process of QA and QC is undertaken at various stages of the production in order to maintain the standard of the product. The production department will take batches depending upon the production plan and will ensure that all products are produced as per the Standard Operating procedure for the individual product. During production also there will be an in-process sample sent to Quality Control to test as per specifications. The finished product is sent to the QA and QC Department and only after the receipt of approval, the product is unloaded and handed over to stores department for packing and labelling of the product.

Finally, the Stores department moves all produced material to storage and based on dispatch requirements following inputs from Sales the material is dispatched to the major transport hubs such as Bhiwandi, Kalamoli, Vashi and material dropped off to customer designated transporter warehouses.

While facing competition from various players, the company has honed its expertise and remains a strong contender in the market.

CUSTOMERS, SALES AND MARKETING

Our business operations and products primarily cater to the business-to-business segment. We maintain direct contact with majority of our customers which allows us to understand the technical needs and specifications of our customers. As a B2B manufacturer, our channels of marketing are such that we need to reach and target our clients of various industries to offer our diversified products. Physical access to B2B decision makers is always difficult and restricted; hence the first step is to connect with them digitally. We have in-house team which looks after the sales and marketing of our products. This team is also responsible for the marketing of our products, negotiating prices, procuring repeat orders and ensuring timely dispatch and deliveries. Our sales team has built long-term relationships with a number of our customers.

INVENTORY MANAGEMENT

Our finished products and raw materials are mainly stored our manufacturing facility, our warehouses at Lote MIDC and Panvel. Our products after clearing the Quality control checks are stored at these facilities and based on dispatch requirements following inputs from Sales the material is dispatched to the major transport hubs such as Bhiwandi, Kalamboli, Vashi in Maharashtra and material dropped off to customer designated transporter warehouses. In some cases, according to customer demand we hold strategic stock, so our lead times can be reduced. These are in most cases according to a stocking policy with customers, but in some instances, these are pro-active steps taken by the organisation to ensure

better supply chain management.

Our minimum stock level for raw materials, packaging material and finished goods is maintained based on input from sales and lead time of raw materials and production lead time. We also analyze estimated lead time, delivery schedule, nature and speed of transport (e.g. fast mover or slow mover) while managing our inventory level at our manufacturing facilities and ware houses.

INFORMATION TECHNOLOGY

We believe that an appropriate information technology infrastructure is important in order to support the growth of our business. Our manufacturing facility is connected to our central IT network that facilitates monitoring of our operations and management of supply chain. Our IT infrastructure enables us to track procurement of raw materials, sale of finished goods, payments to vendors and receivables from customers.

REPAIR AND MAINTENANCE

We conduct periodic repair and maintenance programs for our manufacturing facility. Our machinery and electrical repair teams carry out periodic maintenance and repair of the plants and machinery on an as-needed basis. In addition, our manufacturing facility is periodically inspected by our technicians.

QUALITY CONTROL AND ASSURANCE

We operate at a high environmental, health, safety and quality standards in our operations. The Company got ISO Certified in the year 2021 as ISO 9001:2015. To ensure that our products adhere to the quality standards, we employ a stringent set of tests at every step of product development and the supply chain. In-process quality control is employed by implementing critical control points in various manufacturing SOPs. In addition, each production process and log sheet is audited frequently to ensure it is being followed. Once manufactured, the products are tested on physical and chemical characteristics to ensure they meet the required specifications. They are also tested for microbial content to ensure no contamination occurs in the relevant products. After every batch the vessel is also subjected to a stringent high-pressure cleaning followed by chemical testing to ensure that no cross-contamination occurs between batches. Apart from the product, we also test packing material for drop strength, compression strength and leakage to ensure their integrity during storage and transit.

We have a dedicated in-house team of professionals at Lote Manufacturing Facility who ensure Quality Control and Quality Assurance of the Chemical products.

LOGISTICS

Once any raw material is ordered by production team, the suppliers either deliver goods directly to Manufacturing factory or our designated transporter collects the material from transportation hubs such as Bhiwandi, Kalamboli or Vashi in Maharashtra and deliver the same to the factory. In case of Finished goods, the product is dispatched to transportation hubs as mentioned earlier and is then picked up by the designated transportation team of the customer. We do not provide direct supply of products to our customer instead the product is picked up by them through their designated transporter from our warehouses or the aforementioned transportation hubs.

ENVIRONMENT, HEALTH & SAFETY AND WASTE MANAGEMENT

Our activities are subject to various environmental laws and regulations which govern, among other matters, air emissions, waste water discharges, the handling, storage and disposal of hazardous substances and wastes and employee health and employee safety. For further information, see “*Key Industry Regulations*” beginning on page no. 133 of this Prospectus.

We continue to ensure compliance with applicable health and safety regulations and other requirements in our operations. We have complied, and will continue to comply, with all applicable environmental and associated laws, rules and regulations. The waste generation of the facility is restricted to water generated during the washing of reactors as the facility has batch process system and after every product change the reactors have to be washed. The washing effluent generated is collected at the Effluent treatment facility within the factory through internal drains and chambers. After collection, the effluent water is treated to levels as per MPCB norms which include primary, secondary, and tertiary treatment after which the water is sent by pipelines installed by MIDC in the industrial facility to the common effluent treatment plant of the MIDC

for final treatment.

Note : 1 : As per Ind AS 109 (Financial Instruments), Financial assets are defined as any asset that is (a) cash, (b) an equity instrument of another entity, (c) a contractual right to receive cash or another financial asset from another entity or to exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity; or (d) a contract that will or may be settled in entity's own equity instruments and is a non-derivative for which the entity is or may be obliged to receive a variable number of entity's own equity instruments or a derivative that will or may be settled other than by exchange of fixed amount of entity's own equity instruments.

Since the aforesaid security deposits are receivable in cash at the end of contract period therefore, they are considered as financial assets.

However, out of the above, deposits amounting to Rs. 4,90,100 are provided to the customers and will be refunded when the business operations are suspended or ended within the parties and since the period is uncertain and not decided within the parties therefore it is difficult to give the treatment as per Ind AS 32. Hence the same is recognised at cost.

Additionally, Ind AS 116, Lease, provides exclusions wherein a lessee can elect not to apply Ind AS 116's recognition requirements to- (a) Short term leases and (b) Leases for which underlying asset is of low value.

The aforesaid deposits include security deposit amounting to Rs. 2,00,000 which is in regards to warehouse taken on rent. The said agreement of rent is for shorter period i.e. 12 months therefore the same shall fall under the scope of exclusions of Ind AS 116 hence the security deposit will be recognised at cost and expense in relation to the same will be booked through Profit and Loss Account on straight line basis over the lease term.

Further, deposit amounting to Rs.4,00,000 is in regards to machinery taken on rent and would also fall under the scope of exclusion therefore the same is also recognised at cost.

Rational for Substantial Increase in PAT Margin: -

As per the restated financials, Profit after Tax (PAT) has increased from 4.31 lakhs in FY 2022 to 389.44 lakhs in FY 2023 and 675.01 lakhs in Stub period December 2023. Notably, this substantial increase in PAT has occurred due to corresponding substantial increase in revenue from operations. The reason for spike in sales is that the company's portfolio earlier comprised of only 8-10 products. However, subsequent to strategic expansions, the company diversified its operations to encompass 45 to 50 products. This diversification in products catalyzed a surge in the company's order book and consequently Revenue from operations.

Due to the diversification in products, the company was able to optimize its manufacturing resources and operate with higher efficiency resulting in a higher gross margins on products sold and lower fixed cost of manufacturing. The Factory and Manufacturing Factory expenses as a percentage to revenue drastically fell from 9.39% in Fiscal year 2021-22 to 5.45% in Fiscal year 2022-23 and 4.36% in period ended December 2023. This resulted in higher PAT margins for the company.

Further, the factory capacity utilisation of the company has substantially increased to 2176 MT/PA for FY 2023 from 943.72 MT/PA in FY 2022. The Gross Revenue of the company has increased by 2.3 times and did not result in substantial increase in fixed expenses of the company. Factory Expense includes Factory rental, Factory staff salary, Security expense & other Factory expenses (consumables, repairs and maintenance) along with selling and distribution expense which are in the nature of fixed expenses. The substantial savings on fixed expenses due to increase in turnover of the company is one of the reason for substantial profits in FY 2023 as compared to FY 2022.

As operations in the specialty chemical industry have improved, there has been a noticeable expansion in the product basket to incorporate higher-margin, more specialized products. This shift represents a strategic evolution towards catering to niche markets and maximizing profitability, departing from earlier offerings that were less specialized and yielded lower margins.

Post Covid, there was a volatility in the prices of raw materials, and there was a sharp decrease in certain chemical items like Molten Phenol, Styrene Monomer, etc. which was acquired at lower prices which is also a contributing factor for increasing Profit after tax (PAT).

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectoral cap i.e. 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. Further, other non-residents applying on a repatriation basis, FVCIs and multilateral and bilateral development financial institutions are not permitted to participate in the Issue. As per the existing policy of the Government of India, OCBs cannot participate in this issue. See “*Issue Procedure*” beginning on page no. 252 of this Prospectus.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidated FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See “*Issue Procedure*” beginning on page no. 252 of this Prospectus.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue

Period.
