**Date:** June 17, 2024

Introducing **Southern Emulsifier Solutions Pty Ltd**, subsidiary of Indian Emulsifiers Limited in Australia registered at Southern Emulsifier Solutions Pty Ltd, Suite 3A16 Level 14, 275 Alfred Street N, North Sydney, NSW 2060.

Indian Emulsifiers Limited plans to cater to the Mining Explosives manufacturers in Australia through its subsidiary Southern Emulsifier Solutions Pty Ltd.

## **Australian Market: -**

The two applications for commercial explosives are mining and civil engineering markets. In Australia mining is the dominant application with civil quarrying and tunnelling being less than 10% of the market Explosives products used in mining are either granular ANFO (ammonium nitrate fuel oil mixture) or emulsion. Emulsion explosives are used when the explosive is likely to become wet. Ground water in blastholes is common in mines.

Wet mining conditions and long sleep times mean that emulsion water resistance is crucial. Emulsion products are formulated for open pit mining, underground mining and in bulk or packaged forms.

All Australian explosives suppliers manufacture bulk emulsion explosives. Emulsions are formulated to suit the explosive parameters and are optimized for cost effectiveness and the ease of manufacture and transportation.

Explosive manufacturers have the prime responsibility to in formulating emulsions however the emulsifier supplier has a crucial role to play in the optimization process through formulation of the emulsifier and on-site technical service.

Explosives companies often have limited knowledge of emulsifier composition and properties. Emulsifier suppliers are expected to advise on product selection appropriate for the type of emulsion manufacturing process. These vary from high-speed continuous plants to small batch emulsion plants. Explosives manufacturers may also rely on technical support from emulsifier suppliers in the resolution of other problems that occur during the blasting process. For example, minimization of blast fumes.

## **Project: -**

Southern Emulsifier Solutions Pty Ltd plans to work with emulsion explosive manufacturers in Australia by offering them tailor made emulsifier solutions to meet their needs. The products will be manufactured and supplied by Indian Emulsifiers Ltd initially as the process of localization in Australia has started and will be completed soon to help the company to improve cost and supply chain efficiency thereby increasing customer reliability and trust.

## **About Indian Emulsifiers Limited: -**

Our Promoter laid down the foundation of our company in the year 2020 with a vision to become a pioneer specialty chemicals manufacturer with a focus on tailor-made solutions to meet customers' diverse requirements, as we believe that Chemistry Drives Performance.

The Company was incorporated with the objective of Manufacturing and Supplying of Specialty Chemicals i.e Esters, Phosphate Esters, Imidazolines, Succinimides, Sulfosuccinates, Specialty Emulsifiers, formulated products and Speciality Emulsifiers.

The Company serves specialty chemicals to wide range of industries such as Mining, Textile, Cleaning Industry, Lubricants, PVC, Rubber, Personal Care, Food and Other Industries.
