IEML Secures ₹20 Crore Commitment from LC Venture Debt Fund to Accelerate Growth and Strengthen Global Subsidiaries

The Company has secured a commitment of up to ₹20 Crore from LC Venture Debt Fund through the issuance of secured, redeemable non-convertible debentures, underscoring strong institutional confidence in its business model, execution capabilities, and long-term growth trajectory.

An initial tranche of ₹10 Crore is currently being subscribed, with the remaining capital available for drawdown in line with the Company's evolving business requirements and growth milestones.

The capital will primarily be deployed towards strengthening and scaling the Company's foreign subsidiaries, enabling deeper market development, improved operational alignment, and enhanced capabilities. The funding will support the Company's ongoing operational momentum, including improving efficiency, optimizing resource deployment, and reinforcing the overall resilience of its business.

The phased drawdown structure reflects a disciplined and forward-looking capital strategy, allowing the Company to align funding with execution priorities while maintaining financial flexibility and balance sheet strength. This approach ensures that capital is utilized efficiently, supporting growth without creating excess leverage or idle liquidity.

The transaction has been structured to optimize the Company's asset base while preserving existing security arrangements, ensuring that current stakeholders remain fully protected. This balanced framework highlights the Company's continued focus on responsible financial management, combining growth acceleration with prudent risk oversight.

With this funding, the Company is well-positioned to capitalize on emerging opportunities, scale its presence, and drive sustainable, long-term value creation for all stakeholders.
